Bill Phillips,

Bestway Laundry Solutions offers commercial laundry equipment, with a few specialized models requiring compressed air. Each model has a unique air consumption requirement. Additionally, laundry rooms often times have special circumstances and challenges, including noise concerns (especially in hospitality markets), space limitations, and customized installations. Aero Compressor has assisted Bestway in specifying the best compressor for the job – even putting us in contact with the manufacturer when needed.

Aero has also provided excellent assistance and coordination in the field during start-up, as well as quality follow-up for service calls and maintenance.

Best of all, the customer service from Aero has been top notch. They have demonstrated a desire to put the interests of my customer first. In one circumstance where the needs of the customer changed, Aero acted quickly and professionally to re-order the correct compressor and exchange the original order with ease.

As a Vendor, Aero is the kind of partner I can rely upon.

Neil Worthington
